

HEATER OF PAINTS

Vulkan 35

- **Approved EEx**
- **Ideal for high viscosity materials**
- **Ideal for water based paint**
- **High thickness of layer is possible**
- **Good continuous progress**
- **Solvent economy**
- **Best quality in finishing**
- **Better work's conditions**
- **Maintenance-free**
- **Atex version.**

Features VULKAN 35

length	440 mm
width	220 mm
height	180 mm
Rated voltage	230 volts/50/60 Hz
Rated current	16 amps
Rated output	3.500 watts
Max. working pressure	250 bar
Max. temperature	165°
Flow volume	72 l/h

The paint heater Vulkan 35 can be used with low and high pressure systems. The hot spraying saves solvent cost and as well paints, higher thickness of layer and increases gloss degree. Few operations are necessary and a better surface quality can be achieved. Good for water based paints, high surface quality.
